Strategic Plan 2017-2020 *at a glance*

Our Purpose

To recuperate, create and cultivate local knowledge and wisdom in order to leverage our organisations, institutions and communities to become effective catalyts of change for a more resilient future.

Our Ethics & Principles

Our three principles are grounded in the ethics of Resilience & Nonviolence:

EQUILIBRIUM

To strike a dynamic eco-social balance that is responsive to our changing social and ecological contexts. This principle is a key part of the resiliency process and is anchored in the sense of belonging.

EQUITY

To advocate for equity, which is the pillar of social justice. This principle is based on, but not limited to, equity in gender, race, ethnicity, socio-economic status, sexual identity, physical abilities, and age.

EMPATHY

To learn with and walk alongside people of diverse social, cultural and economic backgrounds, with humility and solidarity.

Our Community Services

Our community services put into practice our three transversal principles and our grounding ethics of resilience and nonviolence. Regenerative eco-social design is embedded within all three areas of community service:

DESIGN, PLANNING & EVALUATION

We offer tailored consulting services to civil society organisations, public institutions and socially and ecologically responsible enterprises. As members of the European Society of Evaluators, we follow European standards in order to

TRAINING & ENGAGEMENT

We design and deliver trainings that respond to the specific needs of the participants and contracting organisations, institutions and enterprises. We are committed to using participatory and experiential methods, because we know that

RESEARCH & INNOVATION

We are dedicated to participatory action research. As an expression of this commitment, we ensure that all our research is open source. You will therefore find a large number of research documents, analytical methods and training

	<p>provide rigorous analyses and constructive recommendations to the contracting organisations, institutions and enterprises. Specifically, we provide the following consulting services:</p> <ul style="list-style-type: none"> • Regenerative eco-social design • Community participation strategies • Participatory strategic and operational planning • Participatory monitoring and evaluation 	<p>they are highly effective in fostering dialogue, promoting learning and garnering wisdom. Some of the transformative education techniques we use include popular education, social theatre, mindmapping, Indigenous storytelling, systems analysis and systemic and visual facilitation. Specifically, we deliver trainings in the areas of:</p> <ul style="list-style-type: none"> • organisational capacity development • community participation and resiliency • regenerative eco-social design • human rights and nonviolence 	<p>tools available on the Resources page of this website. Specifically, we carry our research in the following areas:</p> <ul style="list-style-type: none"> • organisational capacity development • community participation and resiliency • regenerative eco-social systems and design
